

## Points Chair Report

This was the first year that there was no coefficients for different levels of shows. I think that it doesn't make a large difference in the cases of the champion and reserve but if the club is happy to continue not to use coefficients then we shall continue. As for how the points are calculated I use an excel spreadsheet with each individual horse and rider combination and use formulas to calculate to reduce human error. Once I have everything calculated I have other board members take a look to make sure that it is 100% accurate. I have once again I enjoyed the year on the board and look forward to show season 2018. Good luck everyone!
